H5 Buffalo I & II

The H5 Buffalo I & II data center campus totals 409,200 SF on 43 acres, enabling you to support your growing data center infrastructure requirements.

Why Buffalo

Located in Western New York, Buffalo is strategically positioned between major East Coast population centers, New York City, Chicago and Toronto. The upstate location provides superior connectivity and latency to Europe while benefiting from the favorable economic environment in the area.

Renewable and Redundant

Niagara Falls provides reliable and inexpensive hydro-electric power, allowing the data center to operate on renewable energy. Buffalo is a secure location situated far from zones that are afflicted by natural disasters causing power-disruption. The Tier III Data Center Design Supports deployments of all sizes including those fortune 500 requirements

Diverse Data Center & Colocation Offering

H5 can offer turn-key colocation, private suites, secure cages, or powered shells in a carrier-neutral environment with 24x7 engineering, security and remote hands personnel. The data center campus also offers annual SOC and ISO audits and certifications to adhere to strict compliance and regulatory requirements.
