H5 Omaha

The H5 Omaha data center campus totals 234,500 SF on 32 acres, enabling you to support your growing data center infrastructure requirements.

Why Omaha

Known as the 'Silicon Prairie,' Omaha has attracted a number of hyperscale's including Google and Facebook. The market boasts a growing carrier hotel at 1623 Farnam, significant tax incentives, an educated workforce, and a technology-oriented economy to continue supporting growth in the industry.

Tier III Design

The Omaha data center features redundant power systems and has access to a many of the regions primary metro and long-haul fiber providers. Omaha is a cost-effective location largely free from potential geographic risk factors such as hurricanes, flood or earthquake.
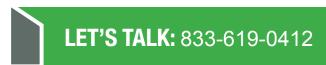

Diverse Data Center & Colocation Offering

H5 can offer turn-key colocation, private suites, secure cages, or powered shells in a carrier-neutral environment with 24x7 engineering, security and remote hands personnel. The data center campus also offers annual SOC and ISO audits and certifications to adhere to strict compliance and regulatory requirements.
